REPORT OF THE TRUSTEES.

THE BOSTON CITY HOSPITAL,
BOSTON, January 31, 1900.

HON. THOMAS N. HART,

Mayor of the City of Boston :

The Trustees of The Boston City Hospital, in compliance with the Ordinances, respectfully present herewith the thirty-sixth annual report *for the year beginning February 1, 1899, to January 31, 1900, inclusive.*

NUMBER OF PATIENTS AND EXPENDITURES.

Number of patients remaining in the Hospital	
January 31, 1899	512
Admitted from February 1, 1899, to January 31, 1900, inclusive :	
Medical	3,431
Surgical	3,673
Gynæcological	565
Ophthalmic	116
Aural	160
	<hr/> 7,945
Treated during the year	<hr/> 8,457
Discharged during the year	7,071
Died	939
	<hr/> 8,010
Number of patients remaining in the Hospital	
January 31, 1900	447
Largest number of patients in the Hospital at any one time	533

Smallest number of patients in the Hospital at any one time	363
Daily average number of patients	454 $\frac{23}{100}$
Average number of days' stay of patients	19 $\frac{60}{100}$
Number of patients accidentally injured, admitted	1,427
Number of weeks' treatment given in Hospital	23,685
Number of days' treatment given in Hospital	165,795
Number of applicants for admission to Hospital	11,557
Number of applicants rejected	3,622
Number of patients treated in Convalescent Home	461

Number of patients treated in the out-patient departments,
classified according to diseases:

For medical diseases	4,094
“ surgical “	11,794
“ diseases of the eye	1,776
“ “ “ “ ear	838
“ “ “ “ skin	1,322
“ “ “ “ women	773
“ “ “ “ the nervous system	737
“ “ “ “ throat	1,522
Surgical out-patients treated in the accident-rooms, and not elsewhere included	3,432
Total number of out-patients	<u>26,288</u>

Number of visits by patients to the out-patient departments,
classified according to diseases:

For medical diseases	7,142
“ surgical “	62,131
“ diseases of the eye	5,504
“ “ “ “ ear	4,671
“ “ “ “ skin	3,095
“ “ “ “ women	4,121
“ “ “ “ the nervous system	4,956
<i>Carried forward</i>	<u>91,620</u>

<i>Brought forward</i>	91,620
For diseases of the throat	3,761
Surgical out-patients treated at accident-room, and not elsewhere included	3,432
Total number of visits of out-patients .	98,813

STATISTICS OF PATIENTS ACCORDING TO SERVICES, FEBRUARY 1, 1899,
TO JANUARY 31, 1900, INCLUSIVE.

SERVICES.	In Hospital Feb. 1, 1899.	Admitted.	Discharged.	Died.	Total Discharged and Died.	In Hospital Feb. 1, 1900.
First Surgical.....	78	1,232	1,116	119	1,235	75

Aural.....	9	160	149	10	159	10
Totals.....	512	7,945	7,071	939	8,010	447

The entire expenditures for all departments of the Hospital during the year was \$407,505. Of this amount, \$291,936.91 was on account of the Hospital proper; \$83,170.68 on account of the South Department; \$10,503.48 on account of the eight out-patient departments; \$8,183.29 for the Convalescent Home; \$2,068 on account of determining the settlement of paying patients; \$2,375.66 on account of new buildings; and \$9,266.98 on account of pathological department.

To the amount expended for the Hospital proper, \$291,936.91 should be added, the difference in the amount of stock on hand February 1, 1900, which was \$2,591.34 less than February 1, 1899; making the total amount chargeable to the expenditures of the year \$294,528.25. Of the total amount expended, several items were for purposes not within

the ordinary yearly maintenance of the patients. From the itemized table of disbursements, it will be seen that there was paid for card cataloguing clinical records, etc., \$500.86; for Medical and Surgical Reports, \$553.48; making a total of \$1,054.34, which, deducted from the total expenditures of the Hospital proper, leaves \$293,473.91 properly chargeable to current expenses. The weekly cost per patient was \$12.39. There has been collected and paid into the City Treasury the sum of \$84,245.48, largely on account of receipts for the board of patients. This amount does not enter into the computation of the weekly cost per patient, as it was paid into the City Treasury.

The maximum number of patients in the Hospital proper at any one time was 533, or eighty-four less than the corresponding number last year. The minimum number at any one time was 363. The daily average number of patients was $454\frac{23}{100}$, or twenty-seven less than last year. The total number of patients treated in the wards was 8,457, which was 262 less than last year, and seventy-five more than two years ago. The Hospital, during the past year, has done a great and good work.

The report of the Superintendent presented herewith contains, besides other information, a more detailed statement of the year's expenditures, the number of patients admitted, and is accompanied by the medical and surgical statistics. These tables give in detail the number of patients treated in the out-patient departments during the year, with classified statements of their diseases, and results of treatment.

PAYING PATIENTS.

There has been collected from patients of all classes the sum of \$76,446.94. There was received from the Commonwealth of Massachusetts, for the board of patients, \$41,940.06; from various cities and towns, \$12,321.64; there has been collected at the Superintendent's office, on account of private room and ward-paying patients, \$20,438.66; and for the board of paying patients at the South Department, \$1,746.58. During the last seventeen years there has been collected and paid into the City Treasury the sum of \$788,538.93.

PATHOLOGICAL LABORATORIES.

Mortuary Chapel and South Department on the left.

Vose House for Nurses on the right.

OUT-PATIENT DEPARTMENTS.

The Hospital proper has developed largely in additional buildings, which have been noted in this and previous reports; but the increased service is not only in the wards and industrial parts, but also in the various out-patient departments. The total number of out-patients treated last year was 26,288, against 22,640 for the previous year, and the total number of visits was 98,813, against 86,507 for the previous year. This increase has been almost entirely in the Surgical Out-Patient Department. Two years ago the number of visits to the Surgical Out-Patient Department was 48,482, against 62,131 during the past year, and within the last five years the total number of surgical cases has doubled. The accommodations, however, remain the same as they were ten years ago, when the number of visits was only 23,855. The building used as a Surgical Out-Patient Department was reconstructed in 1889, and the room that was used for the eight out-patient departments was diverted to the use of the Surgical Out-Patient Department alone, and the other departments moved to their present quarters in the Entrance Office building. The clinics have now become so large that they have been divided into three divisions, — male patients, women and children patients, and the genito-urinary division. This means that three times as many rooms are required, for consulting, examining, and dressing-rooms, as were required ten years ago. The present building, which is more than thirty years old, has walls only eight inches thick, and can neither be enlarged nor extended. The Trustees advise that this building should be razed, and in its place a substantial three-story building be erected, which shall amply provide for the Surgical Out-Patient Department, not only for present use, but for future extension. The Trustees therefore call especial attention again and urge the importance of further appropriation, as more than a year's time would be consumed in the erection of such a building for this part of the Hospital work.

PRESENT CAPACITY OF THE HOSPITAL.

The present capacity of the Hospital is 828 beds, the same as last year.

HOSPITAL RENOVATIONS.

The Superintendent's report shows that the amount expended upon repairs to buildings in all the departments of the Hospital was \$14,952.36, of which amount \$11,955 was upon the Hospital proper.

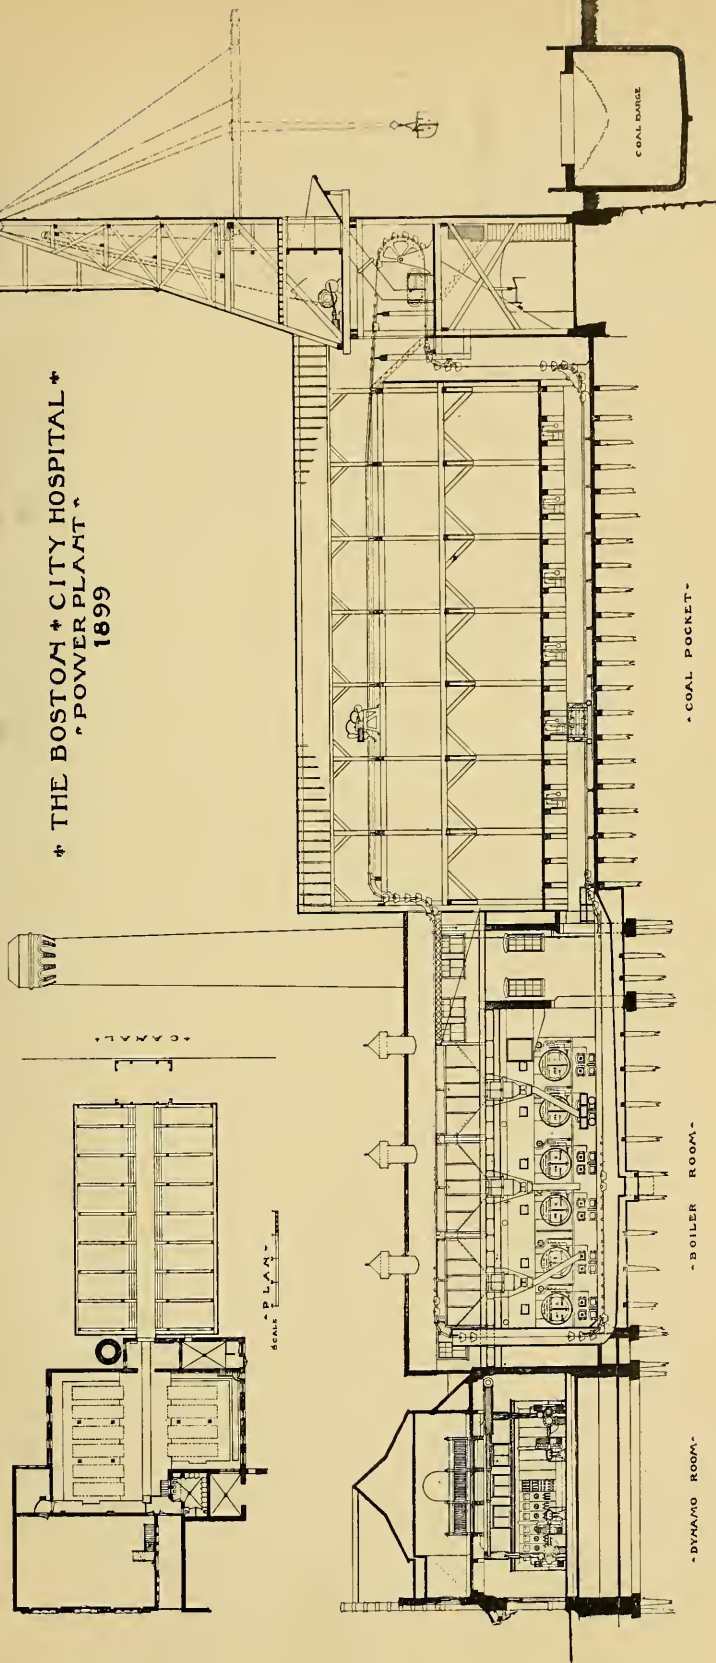

Except the general repairs by carpenters, painters, and plumbers, always needed in a hospital made up of so many buildings, no very extensive repairs have been entered upon, owing to the restricted annual appropriation.

NEW BUILDINGS.

At the close of the year the Vose House for Nurses is practically completed, nearly furnished, and early in the coming hospital year will be occupied. There have been many delays incident to the completing and finishing of this house, which, by the nature of city contracts, the Trustees were unable to obviate.

This new house for nurses, made available through the generosity of Francis C. Welch and the late Hon. George White, executors of the will of Ann White Vose, is a most notable addition, not only as a building for nurses, but also by reason of the noble character of the structure itself. A more complete description of this building will be found in the report of the Superintendent, which description will be more readily understood by the prints inserted in this report.

The new Laundry Building was completed in 1898, but it could not be occupied and maintained as a laundry for lack of sufficient appropriation to supply the required machinery and furnishings. During the past year, however, the building has been furnished and equipped with the best labor-saving machinery to be found in the market. This was done at an expense of nearly \$20,000, and the Trustees believe that it will prove a good example of a suitable institution laundry. The Hospital proper now demands the laundering of between

THE BOSTON CITY HOSPITAL
POWER PLANT
1899

LONGITUDINAL SECTION

POWER PLANT.

80,000 and 90,000 pieces each week, which work can only be accomplished, with good results, by the best and largest machines.

The great growth of the Hospital, alluded to in recent reports, has practically required enlargement of the heating and power plant of the Hospital, the laundry, quarters for house officers, house for nurses, number and size of dining-rooms, as well as chambers for nearly all classes of employees. The Hospital kitchen, however, has remained the same as it was more than twenty years ago, and the work was done under the most cramped and inconvenient conditions. The Trustees have at last been able, by means of the Wyman Building Fund, to temporarily move the Hospital kitchen to the basement of one of the smaller ward buildings, and at the close of the year the kitchen has been enlarged by extending it all the available length and breadth of land practicable for that purpose. When this kitchen shall have been enlarged, completed, and equipped, this part of the executive department of the Hospital will afford the facilities long needed.

HOSPITAL NECESSITIES.

The attention of Your Honor and the Honorable City Council was called to the condition of the grounds about the Vose House at the time of your visit to the Hospital this winter. The grounds about the two houses are in the condition in which they were left by the contractor. They should be graded, seeded, and proper catch-basins and drains made, in common with the rest of the Hospital grounds.

The brick wall on Massachusetts avenue should be extended along Massachusetts avenue and a part of Harrison avenue, to carry out the policy of surrounding the premises with a substantial brick wall, in order to properly protect them. The Trustees have an architect's estimate that \$10,000 is necessary for this work.

The two Nurses' Homes for the Hospital proper should be joined together by a connecting corridor. The domestic arrangements, inspection, the regulating of the habits of the nurses, and the going to and from the houses at meal times, require that the two homes should have intercommunication

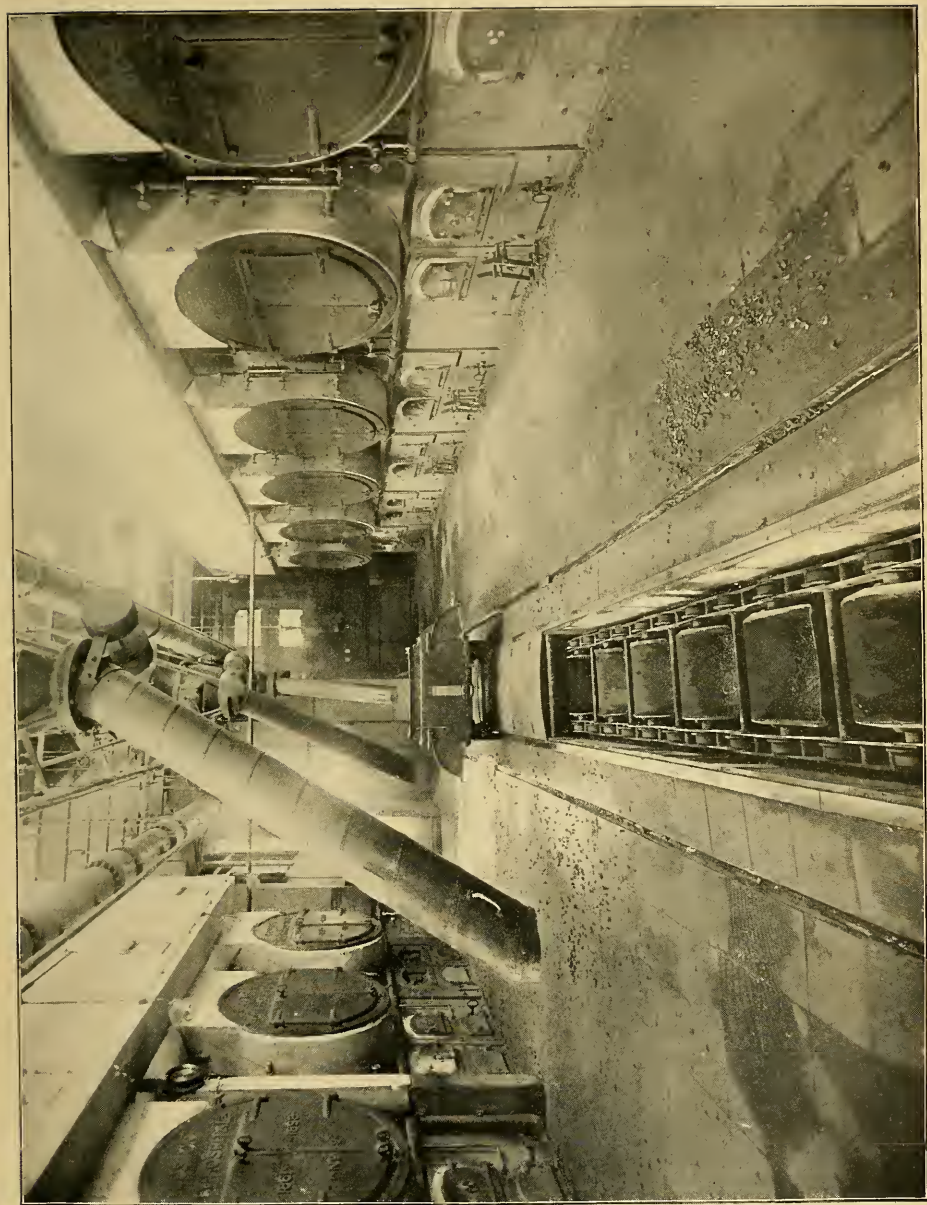

without going out of doors. Plans and specifications for this purpose were drawn during the present year and proposals received, but the amount of money at the disposal of the Trustees was not sufficient, and the plan was abandoned until this year. The Trustees recommend that a special appropriation of \$9,500 be made for this purpose.

A building is very much needed on the Albany street wharf, for storage purposes, which might be of cheap, wooden construction. There are always, in an institution as large as the Boston City Hospital, bedsteads, second-hand furniture, second-hand building material, and odds and ends of value not required for immediate use, but which should serve an economic purpose when wanted. At present the basements under the wards are used for storage, this being the only resource; but this is not in accordance with good hospital hygiene.

SOUTH DEPARTMENT.

The statistics for the South Department, for infectious diseases, for the year from February 1, 1899, to January 31, 1900, inclusive, are as follows:

Number of patients remaining in the South Department	
January 31, 1899	258
Admitted from February 1, 1899, to January 31, 1900, inclusive	2,787
	<hr/>
Treated during the year	3,045
Discharged during the year	2,423
Died during the year	324
	<hr/>
	2,747
Number of patients remaining in the South Department	
January 31, 1900	298
Largest number of patients in the South Department at any one time	323
Smallest number of patients in the South Department at any one time	168
Daily average number of patients	250
Average number of days' stay of patients	30
Number of weeks' treatment given in the South Department	13,053

BOILER HOUSE — SHOWING COAL AND ASH CONVEYORS, WEIGHING HOPPERS, ETC.

Number of days' treatment given in the South Department	91,377
Number of applicants for admission to the South Department	3,621
Number of applicants rejected	834
Number of patients admitted over fifteen years of age	441
Number of patients dying within twenty-four hours of admission	83
Number of patients dying within forty-eight hours of admission	24
Average age of patients	<u>8½</u>

There will be found on pages 51, 52, and 53 a detailed account of the expenditures of this department, the various sub-divisions being kept the same as at the Hospital proper. The approximate sum spent upon this department has been \$83,170.68, to which there should be added the difference in the amount of stock on hand February 1, 1900, which was \$96.20 less than we possessed on February 1, 1899. This gives \$83,266.88 as the sum charged on the books to maintenance for the year. This sum expended upon 3,045 patients treated, and divided by 13,053 weeks' board, gives \$6.37 as the cost per patient per week. The total expenditures upon subsistence supplies was \$24,556.04, and the total number of weeks' board of an average of 358 persons was 18,688. This gives a weekly cost per person, for uncooked subsistence supplies, of \$1.31, or nineteen cents per day.

The death rate of diphtheria in the South Department during the year was 9.9 per cent., as compared with 12.8 per cent. of the previous year. If the cases admitted in a moribund condition, where death occurred within twenty-four hours of admission, are eliminated, the percentage of mortality would be 6.3 per cent. It is also worthy of note that during 1899 55 per cent. of all cases of diphtheria occurring in Boston were treated at the South Department. The ratio of mortality in diphtheria, per 10,000 of the population of Boston, for 1899, was 4.9; a slight increase from the previous year. It must be remembered, however, that during 1899 diphtheria

was epidemic throughout the State. Since the department was opened in September, 1895, the ratio of mortality of diphtheria per 10,000 of the population has fallen from 11.80 to 8.15 in 1898, and 4.9 in 1899.

The Trustees have had much anxiety in regard to the South Department during the last year, on account of its crowded condition. The treatment of infectious diseases requires more space than ordinary medical and surgical diseases, and yet the demands have been so large that the wards and rooms have been crowded to excess, obviously retarding the recovery of patients, and increasing the danger of a spread of infection. The South Department was originally intended for 240 beds, and yet, for continuous months, there were from 300 to 323 patients. From 1895 to 1899 the department was able to receive all cases demanding admission, with occasional exceptions. During the past year, however, on account of the demand for admission, and the crowded condition, there has been a large increase in the number of patients rejected. Two hundred and sixty-six patients were rejected solely for want of accommodations, particularly from December to the following May. Three hundred and twenty-seven applicants were rejected because, after inquiry or visit, it was found that no infectious disease existed. Further details as to the causes of rejection, etc., will be found on page 42. The statistics for the South Department will be found on pages 42 to 45. A large number of the cases rejected were cases of measles, for which the South Department has no accommodations, when it is practically full with diphtheria and scarlet fever. The Trustees, in their last annual report, called attention to the fact that there was no special building for the treatment of measles. One was originally intended, and plans and specifications for the same were made, but, for want of sufficient appropriation, was not then constructed, and the Trustees have not had any appropriation at their command for this purpose since that time. Many complaints have resulted from the rejection of this class of cases.

The following statistics show that there has been an increase in the amount of work during the summer months

over the corresponding period of the preceding year, and a great increase in the winter months. At the beginning of the year there were 258 patients, against 155 the previous year. The number of patients admitted was 2,787, against 1,620 for the previous year. The largest number at any one time was 323, against 260 for the previous year. The daily average number of patients was 250, an increase of 106 over the preceding year. The average days' stay was 30. The total number of weeks' board was 13,053. Of the total number of patients admitted, 324 have died, including 107 who died within forty-eight hours after admission, or 33 per cent. of all deaths.

The sum of \$1,746.58 has been collected from all sources for the payment of patients' board.

The number of patients conveyed to the South Department by special ambulances was 2,237.

The Trustees are gratified in knowing that the benefits of the treatment of infectious diseases in a special hospital are so fully recognized by the general public, particularly by the laboring classes.

CONVALESCENT HOME.

The Convalescent Home is now in its ninth year of its occupancy. The number of patients during the year was 461, and the total number of days' board 9,333. The average weekly cost was \$6.13.

RELIEF AND AMBULANCE STATION ON HAYMARKET SQUARE.

The Trustees are happy to report the adoption of the recommendation made in its thirty-fourth annual report, that a portion of land which had reverted to the City of Boston from the Rapid Transit Commission should be placed under the custody of the Hospital Department for the establishment of a down-town Relief and Ambulance Station. On November 29, 1899, upon an order of the City Council, approved by Mayor Quincy, the Trustees received a portion of land, about 9,000 square feet, on Haymarket square. At the close of the Hospital year the Trustees had under con-

sideration plans and specifications for erecting a building from the Thomas T. Wyman Building Fund.

It is intended to construct a three-story building of brick with marble trimmings, which shall be plain but substantial, and as well suited for the foregoing purposes as possible with the means at command.

TRAINING SCHOOL FOR NURSES.

The Training School for Nurses is in the twenty-second year of its organization. There have been graduated 584 nurses, and of this number, 49 during the past year. There are now 145 nurses, of whom 106 are at the Hospital proper, 37 at the South Department, and 2 at the Convalescent Home.

The third-year course, which was established in 1897, has proved to be a desirable feature in the course. During the year 1898 four graduate nurses received the *cum laude* diploma; 13 in the year 1899, and 5 in 1900; making a total of 22. This third-year feature is restricted to the graduates of this Hospital, and nurses of other institutions are not admitted.

The usual course of study and lectures in practical training has been carefully conducted. The Trustees have information that their graduates are much sought, and are gratified at the favorable reports of their success in practical work.

MEDICAL AND SURGICAL REPORTS.

During the year the tenth volume of the Medical and Surgical Reports has been issued, the editors being Drs. Burrell, Councilman, and Withington. The volume is a book of 231 pages, more or less illustrated. It is all original work, and largely from the Pathological Laboratories. The book has been widely disseminated among hospitals, laboratories, and leading physicians, surgeons, and pathologists, not only in this country but in Europe. The volume has received many commendations from scientific men, and has been in constant demand ever since its first issue. It should be remembered that a large metropolitan hospital not only

DYNAMO ROOM.

AMBULANCE STATION.

serves as a hospital for the care of the sick, but also as an institution for education in medicine and the pursuit of medical science. The opportunities for the dissemination of such knowledge is very large, and the Trustees feel that it is their duty to assist in this most laudable work.

GIFTS, BEQUESTS, AND PERSONAL ASSISTANCE.

In their last annual report the Trustees called attention to the fact that they had received from the Trustees of the estate of the late Thomas T. Wyman the sum of \$65,000. During the past year a second payment has been received, one of \$50,000 and another of \$4,720.40, which, added to the receipts of the previous year, makes the legacy \$119,720.40. This money has been set aside and called the Thomas T. Wyman Building Fund, for future purposes of the Hospital.

The Trustees are also happy to acknowledge from Leopold Louis, executor of the estate of his father, Morris Louis, a check for \$250, the same to be applied for the benefit of the patients in any way the Trustees deem best. The gift has been accepted, to be used for the better equipment of wards for free patients.

MEDICAL AND SURGICAL STAFF.

The following are the changes in the Medical and Surgical Staff during the present year:

R. W. Lovett, M.D., First Assistant Visiting Surgeon; Ernest E. Doble, M.D., Aural Surgeon; R. M. Pearce, M.D., First Assistant in Pathology; A. S. Knight, M.D., Medical Registrar, have resigned.

The following promotions have been made:

Vincent Y. Bowditch, M.D., from Assistant Visiting Physician to Visiting Physician; John L. Morse, M.D., from Physician to Out-Patients to Assistant Visiting Physician; George W. Gay, M.D., from Senior Visiting Surgeon to Senior Surgeon; M. F. Gavin, M.D., from Junior Visiting Surgeon to Senior Visiting Surgeon; H. W. Cushing, M.D., from First Assistant Visiting Surgeon to Junior Visiting Surgeon; John C. Munroe, M.D., and Paul Thorndike, M.D., from Second Assistant Visiting Surgeons to First Assistant

Visiting Surgeons; J. Bapst Blake, M.D., and Fred B. Lund, M.D., from Third Assistant Visiting Surgeons to Second Assistant Visiting Surgeons; Joseph H. Pratt, M.D., from Second Assistant in Pathology to First Assistant in Pathology.

The following new appointments were made:

John N. Coolidge, M.D., as Physician to Out-Patients; Howard A. Lothrop, M.D., and John T. Bottomley, M.D., as Third Assistant Visiting Surgeons, and Harry C. Low, M.D., as Second Assistant in Pathology.

Henry J. Perry, M.D., was appointed Fourth Assistant Visiting Surgeon during the months of June and July, 1899. Edward P. Starbird, M.D., was appointed Fourth Assistant Visiting Physician for Diseases of Women for six months, beginning April 1, 1899, and Franklin F. Newell, M.D., for six months, beginning November 1, 1899.

The Trustees renew their grateful acknowledgments for the many services rendered to the sick by friends of the Hospital. These kindnesses have been so many and so varied that it would be difficult to enumerate them. Hospital readers and visitors have been constant in their attention, and the sympathy and attention shown to patients result not only in their temporary good while in the Hospital, but also in many cases has been followed by assistance after they have left the hospital wards. The usual gifts of fruit, flowers, reading-matter, clothing, and toys have been frequent. The Easter and Christmas music and flower missions have made Christmas and Easter very joyous, particularly in the wards for free patients. The City Missionary Society and the Episcopal City Mission have afforded kindly encouragement to the patients, which has been much appreciated. The Boston Young Men's Christian Union has furnished many free rides, which have been much enjoyed by the patients.

The thanks of the Trustees are specially due to the gentlemen of the Medical and Surgical Staff for their constant and laborious attendance upon the sick, and their interest in matters relating to the Hospital.

Mr. Henry H. Sprague was reappointed Trustee for the term of five years, beginning May 1, 1899.

The Trustees would also express their appreciation of the energetic and efficient services of the Executive and Superintendent, Dr. Rowe, and the Matron, Miss Drown, and their assistants.

Respectfully submitted,

For the Trustees,

A. SHUMAN,

President.

REPORT OF THE SUPERINTENDENT AND RESIDENT PHYSICIAN.

THE BOSTON CITY HOSPITAL, January 31, 1900.

To the Trustees:

GENTLEMEN, — I have the honor to present herewith my annual report of the Hospital for the year February 1, 1899, to January 31, 1900, inclusive.

The following table shows the number of patients who have each year applied for admission and been treated at the Hospital proper:

	Patients examined for ad- mission.	Patients admitted.	Patients accident- ally injured.	Number of out- patients treated.
From June 1, 1864, to Dec. 31, 1864 (7 mos.)..	703	475	129	371
From January 1, 1865, to Dec. 31, 1865.....	1,451	1,066	242	1,143
From January 1, 1866, to Dec. 31, 1866.....	1,749	1,432	345	3,324
From January 1, 1867, to Dec. 31, 1867.....	1,913	1,534	328	7,015
From January 1, 1868, to Dec. 31, 1868.....	2,729	2,078	417	8,794
From Jan. 1, 1869, to April 30, 1870 (16 mos.).	4,632	3,054	482	11,791
From May 1, 1870, to April 30, 1871.....	3,977	2,396	525	8,899
From May 1, 1871, to April 30, 1872.....	4,387	2,873	565	8,947
From May 1, 1872, to April 30, 1873.....	4,326	3,304	660	7,526
From May 1, 1873, to April 30, 1874.....	4,250	3,201	804	9,272
From May 1, 1874, to April 30, 1875.....	4,652	3,424	756	8,732
From May 1, 1875, to April 30, 1876.....	4,434	3,180	689	9,413
From May 1, 1876, to April 30, 1877.....	4,713	3,580	663	8,526
From May 1, 1877, to April 30, 1878.....	5,068	4,034	604	9,658
From May 1, 1878, to April 30, 1879.....	5,285	4,323	734	10,419
From May 1, 1879, to April 30, 1880.....	5,444	3,995	505	10,309
From May 1, 1880, to April 30, 1881.....	5,781	4,418	553	10,605
<i>Carried forward</i>	65,494	48,367	9,001	134,744

	Patients examined for ad- mission.	Patients admitted.	Patients accident- ally injured.	Number of out- patients treated.
<i>Brought forward</i>	65,494	48,367	9,001	134,744
From May 1, 1881, to April 30, 1882.....	5,842	4,107	567	12,035

Net cost to the City for maintaining Hos- pital proper		<u>\$209,324 63</u>

The foregoing tables of disbursements show the expenditures of the Hospital Department during the fiscal year, February 1, 1899, to January 31, 1900, inclusive. Table No. 1 shows the disbursements by departments, according to the general sub-divisions, and includes statistics of the department divided into the Hospital proper, Out-Patient Departments, Pathological Department, Settlement Account, South Department, Convalescent Home and New Buildings. Table No. 2 shows the disbursements for the year in the same departments, itemizing the various sub-divisions, and includes, for all practical purposes, the quantity, cost and average price paid for the various items. Table No. 3 is a *résumé* of Tables 1 and 2, so distributed as to indicate the actual cost of each department, and the net cost to the City for maintaining the Hospital proper.

The total expenditures during the fiscal year for the Hospital Department, in all its various branches, have been \$407,505, and the disbursements have been made as follows:

The Hospital proper	\$291,936 91
Out-Patient Departments	10,503 48
Pathological Department	9,266 98
Settlement Account	2,068 00
South Department	83,170 68
Convalescent Home	8,183 29
New Buildings	2,375 66
	<hr/>
	\$407,505 00

The Hospital Proper.—The Hospital proper has four sub-divisions: The Hospital, Out-Patient Departments, Pathological Department and Settlement Account. It is obvious that the Out-Patient Departments and the Settlement Account have nothing to do with the *pro rata* cost of each hospital bed. The cost of the Pathological Department is included in the *pro rata* cost per patient, as both the clinical and bacteriological laboratories are actively involved in the treatment of patients in the wards, but for executive reasons is tabulated separately, in order to ascertain the cost of running that department. The South Department for infectious diseases, Convalescent Home and expenditures for New Buildings are shown in separate tables.

South Department.—There has been a large increase this year in the number of patients treated at the South Department for infectious diseases. The maximum number at the beginning of the year was 258, against 155 the previous year, and the maximum number on any one day was 323, against 260 for the previous year. The monthly averages have varied from 192 during September to 304 in December, against 71 to 241 during the same months of the previous year. The total expenditure for the South Department was \$83,170.68, against \$71,687.34 for the previous year, and after allowing for the difference in stock at the beginning and close of the year, the sum of \$83,266.88 represents the cost of the maintenance for the fiscal year.

Out-Patient Departments.—The cost for maintaining the eight Out-Patient Departments has been \$10,503.48.

Convalescent Home.—The expenditures for the Conva-

lescent Home were \$8,183.29, or an increase of \$1,503.76 over the previous year. The daily average and the total number of patients treated have been larger than for the previous year.

New Buildings. — The following items of expenditure have been taken from the Hospital maintenance appropriation :

New Buildings	\$794 23
New Laundry Building	1,581 43
<hr/>	
Total	\$2,375 66

These disbursements are recorded because they were taken from the maintenance appropriation for items of expenditure upon the final equipments of the buildings indicated, and not for maintenance.

The Hospital, in recent years, has expanded to much increased proportions, and obviously has largely increased the general expenditures. Its incorporated name is The Boston City Hospital, but in its relation to the city it is the Hospital Department. The total expenditures were \$407,505, but the *net cost* to the city for maintaining the Hospital proper was only \$209,324, or less than one-half of the general expenditures of the whole department. This increase over the previous year is due primarily to the fact that the Hospital never was so large in all its various departments as during the last year. The increase in the cost of supplies alone for the whole department was \$24,506. An analysis of the table shows that the increased cost was not only on account of the quantity, but in the prices. The principal increase has been in subsistence and fuel, and also an increase in nearly all the items of expenditure. The South Department has shown a large excess in the number of patients treated, and an increase in expenditures of \$11,483 over the previous year.

The expenditures upon the Hospital proper for the fiscal year were \$293,473.91. This sum was expended upon the care of 8,457 patients in the wards for 165,795 days' or

23,685 weeks' board, making an average weekly cost of \$12.39, or a daily cost of \$1.77 for patients of all classes in the Hospital proper. This total cost of maintenance and weekly cost per patient represents the statistics usually found in the Hospital finances. The net cost per week per patient to the city was only \$8.83. The average weekly cost of uncooked food supplies for all persons, including patients and the entire household with all grade of service for the Hospital proper, was \$105,461.53. The average number of patients was 454, of officers and employees, including the house and nursing staff, 349, or a total daily average of 803 persons. The total number of week's board for all persons was 41,887, and the weekly cost per person was \$2.51, or 35 cents per day.

In considering the disbursements for the year it is to be remembered that in the previous year the Hospital had a large increase of patients treated in wards, on account of the soldiers in the Spanish-American war, thus providing a larger divisor than usual for estimating the weekly cost.

There has been collected and paid into the City Treasury during the year \$76,446.94 on account of all classes of paying patients, as follows :

From cases paid by the Commonwealth . . .	\$41,940 06
From town and city cases	12,321 64
From private and ward-paying patients . . .	20,438 66
From the South Department	1,746 58
	<hr/>
	\$76,446 94

The interest received from trust funds for the support of free patients was \$1,360, and from the sale of old materials \$293.54. There was also received in payment for the treatment of sick soldiers \$6,145. These sums amount to \$84,245.48, which was the total income of the Hospital Department for the fiscal year. It should again be remembered that under the city ordinances this money was paid into the City Treasury, and hence could not be used for hospital expenditures. This sum reduces the net cost to the city for

the Hospital Department, for all purposes, to the sum of \$323,259.52, and for the Hospital proper, \$209,324.63.

There have been treated in the various out-patient departments 26,288 patients, at a cost of \$10,503.48. Other statistics, found elsewhere, include the number of out-patients, number of their visits, rate of mortality, work of ambulances, census of days' board of all persons, the occupation, nativity, ages, civil condition and physical condition of patients when discharged, which have been tabulated as Hospital Statistics.

The maximum number of patients in the Hospital on any one day was 533, as against 617 in the previous year. The minimum number was 363, in comparison with 399 for the previous year. The daily average during the year was $454\frac{23}{100}$ and the average length of stay was $19\frac{60}{100}$ days.

The annual cost for the Convalescent Home was \$8,183.29. This sum was expended upon 461 patients, who received 9,333 days' or 1,333 weeks' board, at a weekly average cost of \$6.13 per patient.

The total number of deaths from February 1, 1899, to January 31, 1900, was 939. This does not include the statistics of the South Department.

Of the deaths there occurred within

48 hours admission	336 or .040 per cent.
Other deaths	603 or .071 " "

Total	939 or .111 " "
-----------------	-----------------

the rate of mortality for the year ending January 31, 1900.

This percentage of deaths is for the total number of patients treated in the Hospital. Thirty-five per cent. of the total deaths occurred within forty-eight hours after admission.

During the year 8,457 patients were treated in the wards, 26,288 as out-patients, 461 at the Convalescent Home and 3,045 at the South Department, a total of 38,251 who have received the benefits of the Hospital in all departments, or 4,698 more than last year.

During the year 11,557 persons applied for admission. Of this number 7,935 were admitted and 3,622 were rejected,

the latter being 361 more than last year. The number rejected was 31 per cent. of all persons applying. The causes of rejection appear in the table of applicants not admitted on page 35. Of the number not admitted, 471 either changed their minds or were deferred. Of this class, however, 249 were admitted within three days after application, and 68 admitted later. There were also rejected 788, solely for want of vacant beds, but 468 were admitted later. There were 816 applicants who could be treated in the various out-patient departments, without the additional cost of receiving them in the wards. Admission was denied to 215 for lack of information that they were suitable cases. There were transferred to other and more appropriate institutions 715, and 41 were rejected as apparently incurable or unsuitable for treatment here. Various other causes of rejection appear in the tabulated form.

The business of the ambulance service of the Hospital was never so large as during the past year. The total number of persons carried was 6,157, as against 4,753 for the previous year. Of this number 3,920 were for the Hospital proper and 2,237 for the South Department. The odometers on the ambulances show a total of 22,735 miles during the year. The record also indicates that one ambulance, with different horses, went fifty-four miles in one day. The number of accident cases received has been 1,427.

The normal capacity of the Hospital is 828 beds, the same as last year. The Hospital has been deprived of a women's medical ward during the latter part of the year, because the basement of the building had to be used as a temporary kitchen during the alteration and reconstruction of the main hospital kitchen, and the principal portion of the ward was used as a temporary dining-room during the reconstruction of the employees' dining-room. The maximum number of

VOSE HOUSE — LOOKING FROM SOUTH DEPARTMENT.

the ordinary capacity at the South Department is 240, but there have been as many as 323 patients on one day, and the daily average was 250.

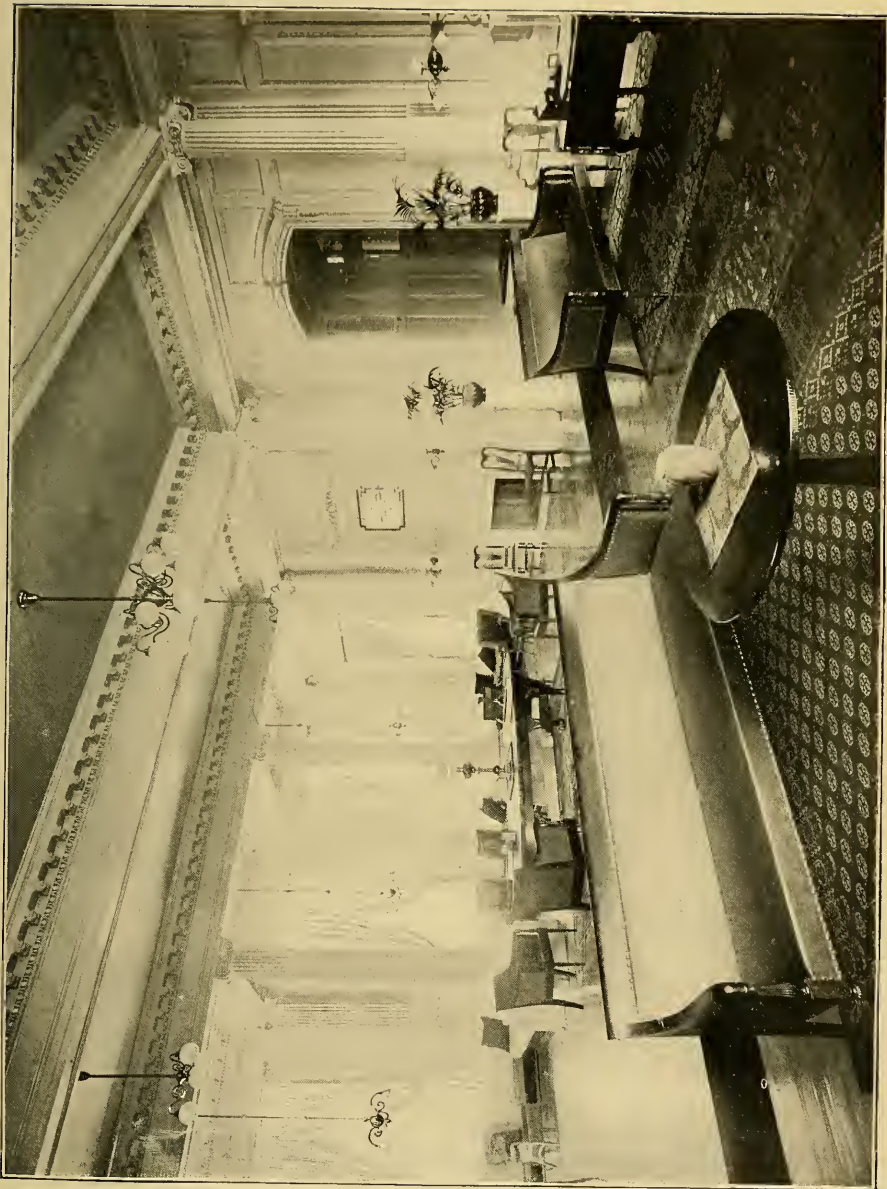

There are now thirty-five buildings in the Hospital Department, varying in size, purpose and construction. Quite a number of them were built more than thirty-six years ago, and have been in constant use. They stand upon reclaimed or made land and upon piles, and as much of the exterior finish is wood, the deterioration of the buildings, both upon the outside and inside, is inevitably very large. To keep all these buildings in order, and secure against the trying conditions of climate and the wear and tear incident to all public buildings, the amount of money devoted to repairs should be not less than \$25,000 annually. But the increased cost in ordinary maintenance made it impossible to expend a sufficient sum, and some of the buildings show great need of radical repairs. There was expended last year, for repairs of the Hospital proper, \$11,955.22, and upon the South Department \$2,586. Although Wards W and X have been occupied only three years the character of the interior finish, particularly the painting, compelled them to be vacated during the summer months for a complete renewal. Many of the operating and surgical rooms were re-enamelled. A large amount of work was done in corridors and other public places. There has been an expenditure of \$1,650.25 for the boilers and heating apparatus of the Hospital. For plumbing repairs and renewals the sum of \$1,232.16 has been expended. The cost for repairs to ambulances, vehicles, harnesses, horse-shoeing, etc., was \$3,318.06, of which \$2,223.11 was charged to the Hospital proper, \$829.51 to the South Department, and \$265.44 to the Convalescent Home.

The employees' dining-room and pantry, upon which practically no repairs have been made for many years, required entire reconstruction, the floor being old and worn through in places. Much of the old plastering was torn off and renewed. A new birch floor was laid in the dining-room and a slate floor in the pantry. The plumbing was entirely renovated, including steam and serving tables.

The greenhouse, for the preservation of plants for summer use, constructed of wood, was so much decayed as to be worthless, and the entire house was reconstructed and raised.

The new Laundry Building was constructed in 1898, but for want of sufficient appropriation laundry machinery was not installed until last year. The building is now completed and furnished, and greatly facilitates one branch of the industrial part of the Hospital.

The building is located in the rear of the administration building, on Albany street, on the spot formerly used for the Hospital boiler-room, and consists of a four-storied structure of brick, with marble trimmings, in the same style as the other buildings recently erected upon the Hospital grounds. It is 92 feet long, with an average width of 38 feet. The laundry work is done on the first, second and third floors, and the fourth story is occupied by laundresses. The lower floor, which is the Hospital wash-room, has walls of enamelled brick, and the floors are granolithic, with convenient drains and water supply. There are five washing-machines and one sterilizing rotary washer, which will wash and sterilize clothes at twenty pounds' pressure of steam. This is a desirable addition to the equipment for saving work, as the washing and sterilizing are done with one handling. There are two metallic washers of 200 shirt capacity, and two wooden washers of 150 shirt capacity. There are three extractors, one shaker-out, and one Hagen six-roll mangle, capable of doing a very large amount of work. The second floor has a large Crawford Jumbo mangle, a Hamilton-Smith mangle for ironing body clothes, and five body ironers. There are also drying, distributing and airing rooms on this floor, and sufficient space for any further additions to machinery required in the future. The third floor is the family laundry. All clothing of officers, nurses and employees is washed upon this floor, and never comes in contact with the ward linen. The family wash-room, which is 23 by 15 feet, has enamelled brick walls and granolithic floors. There are two wooden rotary washers, one extractor, porcelain set tubs and starching machine. In the ironing room there are one shaker-out, one Hagen six-roll mangle, as on the lower floor,

VOSE HOUSE — RECEPTION HALL.

nine body ironers, cuff and collar machine, and other machinery necessary for the work. This floor, also, has special drying and airing rooms. All three floors are connected by an elevator that runs to the roof, where blankets and other hospital clothing that require it can be dried in the open air.

The event of the year is the completion and furnishing of the Vose House for Nurses, made possible through the beneficence of the executors of the will of Ann White Vose. This building is situated upon the Hospital grounds, west of the Nurses' Home, and on the corner of Massachusetts and Harrison avenues. The half-tone print accompanying this report gives its general appearance. The building is brick, with marble trimmings, and conforms to the general character of the buildings previously erected at the South Department. It is four stories high, with the lower floor above ground, except a portion of one wing on the north end. The building is 182 feet long, and in its central portion, 54 feet wide, and through the wings, 39 feet, and is five stories high. The lower floor is devoted to domestic purposes. In the central portion, upon the west side, is a large kitchen 32 feet long by 16 feet wide, properly equipped with a modern hotel range, pastry oven, steam, meat and vegetable kettles. A large refrigerator, 12 feet by 8 feet, with three compartments, opens from the kitchen, between it and the central corridor, and on the opposite side, a pastry room of the same size for general kitchen stores. On the southerly portion is a large dining-room, capable of sitting ninety-eight nurses at one time. Between this dining-room and the kitchen is a pantry and serving-room, with all the modern equipments for carving and keeping food warm, and china closets. The dining-room is irregular in shape, and its southern portion being semi-octagonal, gives plenty of light and sun. In the extreme northerly portion is a large semi-octagonal room which serves as a sewing-room for nurses, for dressmaking and other purposes. There is also a small room, 17 feet by 14 feet, fitted up with porcelain sink, wash-tubs and other outfit, giving nurses the opportunity to do light laundry-work. There is a tea-kitchen, where nurses may serve tea and do light cooking for

themselves at times other than the regular meal hours. There is a large trunk room, 32 feet, and also a parcel room, a bicycle room, a room for clean linen, a room for soiled linen, and toilet-rooms. The corridors of this story are laid with Welsh terra-cotta tiles, the kitchen and pantry with slate tiles, the dining-room with terrazzo, and all other floors with granolithic. On the first or principal story, in the central portion, is a large reception hall, 49 feet long by 32 feet wide and 16 feet high. That portion of the hall which is under the large porch, towards Massachusetts avenue, is divided into alcoves, with fixed settles, upholstered in leather, giving them a semi-private character. The room is finished with wooden panel work, painted ivory white. There are four large fireplaces and mantels, with a bronze tablet over each. This reception hall opens directly into the north and south wings. It was intended that this room, in a large sense, should be a memorial room to the donor of the building. In the north wing is a library for nurses, intended to be used as a quiet room. It is suitably arranged with bookcases and other appropriate furniture. In the southern portion is a sitting-room, with reclining settles, a piano, the recent gift of a former House Officer, and other suitable furniture. There are stairways in the north and south wings, constructed of marble and iron, and in the centre of the south stairway is an elevator. The second, third and fourth stories are practically alike, each having a sitting-room differently located and shaped, giving a variety to the rooms used by the nurses when off duty. The elevation of the lower floor is $12\frac{1}{2}$ feet, the first story 14 feet, second story 11 feet, third story 10 feet, and the fourth story $9\frac{1}{2}$ feet. The sleeping-rooms vary from 8 feet 2 inches to 8 feet 10 inches wide, and 14 feet long, giving 118 square feet of floor space, and 1,180 to 1,650 cubic feet of air space, according to the story on which the different rooms are situated. There are accommodations for ninety-seven nurses, all but four of the rooms being designed for one occupant only. Each sleeping-room contains a white enamelled bedstead, with brass trimmings, a bureau, wash-stand, combination bookcase and writing desk, a small table, rocking-chair, small chair,

VOSE HOUSE — NURSES' LIBRARY.

CLASS ROOM OF TRAINING SCHOOL.

clothes-pole, and a capacious clothes-closet. In the bedrooms, on the first and second stories, the furniture is curly birch, and on the third and fourth stories it is quartered oak. The furniture was specially designed for this building, making it well adapted for a nurse's use. Each floor is suitably equipped with toilet-rooms, as follows: Two rooms with porcelain bath-tubs, one room with Gegenstrom rain bath, three water-closets, one slop-hopper, two set bowls. There are also small rooms for Matron's stores on the second, third and fourth floors. An excellent feature of the Vose House is the five practical balconies, designed for open-air relief for nurses, upon the second, third and fourth stories.

The cost of the building was \$100,000, and for the furnishings, including elevators, refrigerating rooms, etc., \$22,000. The work incident to the training and management of so large a body of women is very much facilitated by reason of these increased accommodations. It is believed that this is one of the best equipped houses for nurses in this country.

The statistics of the Convalescent Home, which has just completed its ninth year, are as follows:

Number of patients in Home at the beginning of the year, January 31, 1899	26
Admitted during the year	435
						—
Total treated during the year	461
Discharged during the year	436
Died during the year	—
Total discharged	436
Number remaining in Home, January 31, 1899	25
Largest number on any one day	34
Smallest number on any one day	14
Daily average number of patients	25
Average length of stay in days	20

The daily average number at the Home was twenty-five, and the weekly cost per patient, \$6.13. The Home has afforded the usual opportunities for patients leaving the Hospital proper and the South Department, for prolonged conva-

lescence. It continues an important addition to the work of the Hospital. On March 21, 1899, a fire occurred in the Home, due to the faulty construction of the woodwork around the central chimney. Having a special fire-alarm box the Fire Department speedily extinguished the fire, which, however, did considerable damage to the rooms in the central portion of the building, and required the tearing out of woodwork, replastering and refurnishing to a limited extent.

The Medical Library has been increased during the year by 211 volumes, 69 being by purchase, and 142 by donation. The total number of volumes at the close of the year was 3,696. The Library has received 558 periodicals, and 2,022 medical monographs or pamphlets.

The work of card-cataloguing the clinical record-books and autopsy records has been continued, and there is now a total of 158,901 index cards.

The Training School for Nurses has completed its twenty-second year. The changes during the year have been as follows:

SUMMARY FROM FEBRUARY 1, 1899, TO FEBRUARY 1, 1900.

February 1, 1899, the number of nurses was . . . 138

During the year nurses have left as follows:

Have been graduated	49
Graduate head nurses resigned	9
Pupils dropped for various causes	12
Probationers not accepted	18
Withdrawal of graduate special nurses	4
	<hr/>
Total vacancies	92
	<hr/>
Number remaining	46
Graduates retained as head nurses	6
Graduates retained as third-year nurses	7
Probationers admitted	75
Pupil nurses readmitted	4
Graduate specials employed	7
	<hr/>
Remaining January 31, 1900	<u>145</u>

VOSE HOUSE—NURSES' DINING ROOM.

VOSE HOUSE—NURSES' BED ROOM.

Nurses connected with the school, in the Hospital proper, February 1, 1900 :

Assistant Superintendents of Nurses	3

Third-year nurses	7
Senior pupils acting head nurses	6
Senior assistant nurses	33
Junior assistant nurses	26
Probation nurses	16
Post-graduate nurse	1
Graduate special nurses	6
	— 106

In the South Department, February 1, 1900 :

Day supervisor of nurses	1
Night supervisor of nurses	1
Graduate head nurses	3
Pupil acting head nurse	1
Senior assistant nurses	9
Junior assistant nurses	21
Graduate special nurse	1
	— 37
	<hr/> 143
Graduates at the Convalescent Home	2
	<hr/> 145
	<hr/>

The Training School has graduated during the year forty-nine nurses, making a total of 584 since the formation of the school. Fifteen nurses have completed the third year and received the *cum laude* diploma.

The Superintendent of Nurses and her Assistants have given 223 class recitations at the Hospital proper, and 157 at the South Department, making a total of 380 recitations during the year. The school has received thirty-seven lectures on Friday afternoons from members of the Medical and Surgical Staff and others.

The cooking classes in the school continue in charge of Miss Mary A. Boland, thirty-two lessons having been given to the classes in sections, in addition to four lectures before the whole school.

Mrs. Gulli J. Callowhill, of the Boston Normal School of Gymnastics, has given seventy lessons in massage to the nurses, in sections of four pupils each.

Six graduate head nurses have left the Hospital during the year to take charge of other hospitals or fill other hospital positions.

Upon the occupation of the Vose House for Nurses a great advance is expected in many things pertaining to their training, by reason of increased facilities. The crowded condition of the Hospital hitherto existing has made it difficult to properly accommodate the Hospital family, but the increased rooms made possible by this new building will be much to our advantage in this respect.

The demand for more nurses by the Medical and Surgical Staff has increased the roll of nurses year by year. The enlargement of the Hospital, both in the Surgical and Gynaecological divisions, has made a part of this increase necessary. Patients require and receive more care each year. In 1894 there were 96 nurses; in 1895, following the opening of the South Department, there were 123; in 1896, 129; in 1897, 124; in 1898, 138, and during the last year 145, showing an increase of 51 per cent. during the last six years.

Although not officially connected with the workings of the Hospital, it is pleasant to record the success of the Boston City Hospital Nurses' Club, which has met at the Hospital on the first Tuesday of each month during the greater part of the year. The meetings are well attended, and offer opportunities whereby graduates, after leaving the Hospital, may continue their acquaintance with each other, and keep in touch with the spirit of the Hospital. The meetings are generally devoted to subjects helpful and interesting to a graduate nurse, and also aim to keep her informed on new methods in hospital work.

During the year several graduates have returned for a short course of two or three months' special study in the

MORTUARY CHAPEL.

different departments. This feature in the School for Nurses is encouraged, and, as far as practicable with the routine work of the Hospital, will be still further developed.

In May, Charles G. Dewey, M.D., Assistant Superintendent for nearly four years, resigned in order to enter upon private practice. Dr. Dewey served well and faithfully, and strengthened the executive department, relieving the Superintendent of many details. Theron H. Carter, M.D., First Executive Assistant, was appointed Acting Assistant Superintendent, but died suddenly only a few months after his appointment. Dr. Carter was an efficient and conscientious worker, and his death was much regretted by the whole household.

Edward Stanley Abbot, M.D., a former House Officer in this Hospital, Assistant at the McLean Hospital, and recently Assistant Superintendent of the Northampton Hospital for the Insane, in November was appointed Assistant Superintendent. On January 1, 1900, William E. Currier, M.D., was appointed First Executive Assistant, and Frederic R. Cummings, M.D., Second Executive Assistant.

Grateful appreciation is due to the various heads of departments associated with me in the management of the Hospital, as well as to officers, nurses, orderlies and other employees. The success of a large general hospital depends upon the united efforts of many workers, and not upon that of a few, and I desire to make public recognition of this fact.

In presenting my twenty-first annual report to the Trustees, I beg to renew my cordial acknowledgments for their personal kindness and official support.

I have the honor to be

Your obedient servant,

G. H. M. ROWE, M.D.,

Superintendent and Resident Physician.

BEQUESTS.

GOODNOW FUND.—ELISHA GOODNOW of South Boston, who died in the year 1851, bequeathed to the city “all the rest and residue of my estate, real and personal, not otherwise disposed of” for the purpose of establishing in the Eleventh or Twelfth Wards of the city a hospital for the sick; one-half of said fund to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the officers of the government of said hospital for the time being. Under this will the city came into possession of \$26,000 for the support of free beds.

NICHOLS FUND.—LAWRENCE NICHOLS, who died in September, 1862, made a bequest to the city of the sum of \$2,000 for “the establishment and endowment of a city hospital.”

NORCROSS FUND.—1868, January 1. The Trustees received the sum of \$2,000 from Hon. OTIS NORCROSS, as the foundation of a fund for the benefit of patients leaving the Hospital poor and destitute of proper clothing.

Balance on hand, February 1, 1899	.	.	.	\$317	10
Received interest	.	.	.	111	05
				<hr/>	
				\$428	15

The "Act to incorporate the Trustees of the City Hospital of the city of Boston" (see Acts and Resolves, 1880, chapter 174, approved April 7) provides that "money received by it shall be invested by the Treasurer of the city of Boston under the direction of the Finance Committee of said city; and all securities belonging to said corporation shall be placed in the custody of said Treasurer; *provided*, always, that both the principal and income thereof shall be appropriated according to the terms of the donation, devise or bequest, under the direction of said corporation."

HOUSE RULES.

WITH RULES FOR ADMISSION, GOVERNMENT AND DIS-
CHARGES OF PATIENTS; ALSO RULES FOR VISITORS.

HOUSE RULES.

The doors and gates of the Hospital will be closed at 10 o'clock in the evening, at which time all inmates shall be quiet, and all not on duty shall be in their rooms, unless otherwise specifically permitted.

All officers, nurses and employés of the Hospital, when going and coming to and from the Hospital, shall enter and go out by the Entrance Office and by no other entrance. Such officers and employés as are required shall use the time-register and method of booking that the Hospital rules require.

A record shall be kept of all persons entering the Hospital between the hours of 10 o'clock in the evening and 7.30 o'clock in the morning.

No employé shall be absent from the Hospital, except when permitted by special rules or by the Superintendent.

No officer, nurse, orderly or other employé shall directly or indirectly receive money or other gifts from, or in behalf of patients, except with the approval of the Superintendent.

The use of tobacco, wine and intoxicating liquors is prohibited within the Hospital, unless prescribed by the Physicians or Surgeons.

All profane and improper language, loud talking and incivility, are prohibited.

All employés shall observe such further rules and directions for their conduct as may from time to time be established.

ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the Hospital, on each day of the week, Sunday excepted, between 9 and 1 o'clock.

Whenever able, a patient shall apply in person for admission; when not able to apply in person, a patient may be admitted on application made in his behalf, or upon visit at his residence by the admitting Physician.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Patients may be admitted to the privileges of the Hospital at such rates of board as the Trustees may, from time to time, by vote, determine; payment for such board being secured by the friends of the patients or by the authorities of the cities or towns to which the patients belong.

Whenever, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital, are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

No person having acute venereal disease, or alcoholism, shall be admitted, except as a paying patient.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms, which are deemed capable of being relieved.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the Hospital.

Patients shall be in their proper places in the wards during the visits of the Physicians and Surgeons, and always before 7.30 o'clock in the evening, unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing, and perform such other services as may be reasonably required of them.

No patient shall leave the Hospital grounds without a pass from the Superintendent, nor leave his ward without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of a particular religious rite shall be granted when practicable.

Complaints, for whatever cause, may be made to the Superintendent, and whenever requested shall be by him reported to the Trustees.

DISCHARGE OF PATIENTS.

Patients shall be discharged by the Superintendent.

Patients discharged on the recommendation of the Visiting Physicians or Surgeons shall be provided with a certificate,

stating their condition at the time of discharge, whether cured, relieved or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the approval of the Superintendent, a written statement to that effect shall be required from any person assuming the responsibility of the removal.

VISITORS.

No person shall visit any part of the premises, except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

On week days from 2 to 3 o'clock in the afternoon, friends may be permitted to visit patients, though no patient shall receive more than two visitors on the same day. In all cases, however, the Trustees and Superintendent may exercise discretionary powers as to excluding or admitting visitors.

When visitors are admitted outside of the regular visiting hours they shall not be permitted to remain more than half an hour, except a special permission to remain for further time is granted.

All visitors shall leave the Hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the Hospital, or pass the night therein, without permission of the Superintendent or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left at the Entrance Office.

SPECIAL RULES FOR THE GOVERNMENT OF THE SOUTH DEPARTMENT.

The department of The Boston City Hospital, located on the westerly side of Massachusetts avenue, shall be designated as the South Department of the Boston City Hospital. It shall receive patients who require treatment for diphtheria and scarlet fever, and for other infectious diseases as may be determined from time to time by the Trustees.

The Superintendent of the Hospital shall, under the direction of the Trustees, have the general control and management of this department, in the same manner as of other departments of the Hospital.

The Rules of the Hospital shall, so far as applicable, and except as hereinafter provided, apply to the various officers and employés and to the conduct and management of this department.

SPECIAL RULES FOR THE GOVERNMENT OF THE CONVALESCENT HOME.

The department of The Boston City Hospital, located on Dorchester avenue in Dorchester, shall be known as the Convalescent Home, and shall receive such patients recovering from acute diseases as shall be transferred to it from the main Hospital for treatment during convalescence.

The Superintendent of the Hospital shall, under the direction of the Trustees, have the control and management of the Convalescent Home, in the same manner as of other departments of the Hospital.

The Superintendent shall appoint, subject to the approval of the Trustees, a Matron, and shall employ, under their direction, such further assistants as may be necessary for the proper conduct and service of the Home.

The Matron, under the direction of the Superintendent, shall have the immediate charge of the Home, and the control of all nurses and other employés and patients. She shall reside at the Home.

ADMISSION AND DISCHARGE OF PATIENTS.

Patients shall be transferred from the Hospital to the Convalescent Home by the Superintendent, subject to the direction of the Trustees, on recommendation of the Visiting Staff or otherwise; and the Superintendent shall keep a record of all patients so transferred. When patients are so transferred they shall be considered as discharged from the Hospital. Payment for board shall be required, the same as of patients at the Hospital, but separate apartments shall not be furnished at the Home. No person whose case is adjudged to be incurable shall be admitted to the Home.

Patients shall not be allowed to remain at the Home for a longer period than two weeks, except on recommendation of the Physicians, or for special cause approved in writing by the Superintendent. All patients remaining beyond the period of four weeks shall be forthwith reported to the Trustees.

Patients when discharged shall be provided with a certificate, stating the date of admission and discharge, and their condition when leaving the Home.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all rules established for the Government of the Home.

VISITORS.

Friends may be permitted to visit patients on week days, between 3 and 4 o'clock in the afternoon. In all cases the Trustees, Superintendent, and Matron may exercise discretionary powers as to excluding or admitting visitors.

Visitors shall leave the Home and grounds at the expiration of the visiting hour, and shall visit no part of the Home or grounds other than the reception room, except by permission from the proper authority.

No person shall give any article of food or drink to a patient unless by permission of the Matron.

THE BOSTON CITY HOSPITAL. TRAINING SCHOOL FOR NURSES.

The Trustees of The Boston City Hospital in 1878 established a Training School for Nurses, in order to give to women desirous of becoming professional nurses a systematic course of training and practice.

The Training School is controlled by the Trustees of the Hospital, like all other departments of the Hospital service. The Superintendent of the Hospital has the general supervision of all matters relating to the school, its course of work and study, lectures and discipline. The Superintendent of Nurses has the immediate charge of all the nursing in the Hospital, of all persons employed in the wards, and also the instruction and management of the nurses in the Training School. All female nurses in the Hospital must be connected with the school.

The course requires two years, and includes general medical and surgical nursing, together with ophthalmic, aural and gynæcological nursing, and also the nursing of contagious diseases. Maternity nursing is theoretically taught, but there are no maternity wards connected with the Hospital. Those wishing to receive such a course of instruction should apply to the Superintendent of The Boston City Hospital.

The most desirable age for candidates is from twenty-three to thirty-five years. They must be of sound health, and should send with their application a certificate from a physician, certifying to the fact. They should also send a brief personal history, and give the names and addresses of three responsible persons, not of their own kin, who know of their good character and capabilities. Upon the recommendation of the Superintendent and the approval of the Trustees, they will be received for two months on probation. The fitness of candidates for the training and work, and the propriety of retaining or dismissing them, will be determined by the authorities in charge of the school, under the direction of the Trustees.

At the end of the first month, candidates, if considered satisfactory, are permitted to wear the cap and enter upon the regular course of training, but such candidates are not permitted to join the school formally until the end of the second month, when, if accepted, they sign an agreement to complete the prescribed course of two years, and to conform to all rules. At the end of the first six months the record and work of each pupil are carefully scrutinized as to her fitness to make a good nurse, and the right is reserved by the authorities of the Hospital to terminate then, or at any time, the connection of any pupil or nurse with the school, for inefficiency, misconduct, generally unsatisfactory record, or for any other reason which may be deemed sufficient.

During the first two months pupils are called Probationers, for the remainder of the first year Junior Nurses, and during the second year Senior Nurses. Nurses who remain in the Hospital after graduation become Head Nurses.

The nurses in the Training School (including Probationers) reside at the three Nurses' Homes connected with the Hospital, which have rooms for two hundred nurses. The houses afford home-like surroundings, and have the best of conditions necessary to good health and personal hygiene.

The Superintendent of Nurses has the immediate charge of the Training School, under the authority of the Superintendent of the Hospital and of the Trustees, and the nurses are subject to the rules of the Hospital, like any other services.

The instruction includes the general care of the sick, the making of beds, changing bed and body linen, managing of helpless patients in bed, etc.; giving baths, keeping patients warm or cool, prevention and dressing of bed-sores, and proper management of the patient under various conditions, with different diseases or injuries; the making and applying of bandages and rollers, preparation of splints, application and management of surgical apparatus, applying of fomentations and poultices, the dressing of burns, ulcers, and wounds, and other minor dressings, cupping, leeching and subsequent treatment, and the administering of enemias.

Nurses are taught how to act in the various emergencies occurring in Hospital and private nursing, as well as in the accidents of ordinary life. They are also given lessons in *massage* by a professional instructor. There is a systematic course of training in cookery for the sick, the serving of food and delicacies in the proper manner, and the feeding of helpless patients, or those who resist food.

Instruction is also given in the best practical methods of

supplying fresh air, of warming and ventilating sick rooms in a proper manner, and the proper care of sick rooms for the best good and comfort of the patient; in keeping all utensils and appliances perfectly clean and disinfected; in making accurate observations of the pulse, temperature, respiration, expectorations, the secretions, state of the skin and eruptions; of mental condition as to delirium, stupor, shock, etc.; of the conditions as to sleep, appetite, effects of diet or of stimulants and medicines; the behavior of wounds and the after treatment in surgical operations; and in the managing of convalescents. Nurses are taught the administering of medicines and the application of external remedies, how to take notes on cases, the making up of the nurses' record, and the reports to the attending doctor.

The course of training includes a fixed course of instruction during the two years from manuals and text-books, mainly given by the Superintendent of Nurses, the Assistant Superintendents of Nurses, and graduate head nurses. Lectures and demonstrations, chiefly upon practical points, are given at stated times by the medical and surgical staff of the Hospital. While the instruction by the manuals, text-books, lectures, demonstrations, quizzes and models is considerable, the main reliance is upon accurate daily drill in the wards, operating rooms and other departments of the Hospital. Examinations, both written and oral, are held from time to time by the authorities of the school and by the Hospital staff, and nurses cannot pass to graduation unless attaining, on critical marking, at least 70 per cent.

The pupils are employed as assistant nurses in the wards, operating rooms and out-patient departments of the Hospital. They are given six months' training in medical wards, and six months' in surgical wards; the remainder of the time to be in such wards or departments as the management may appoint.

Probationers are not paid during their first month, but for the remaining months of the junior year they receive seven (7) dollars per month, and for the senior year, ten (10) dollars per month, to pay for the expenses of their uniform, personal clothing, and other minor requirements. This sum is in nowise intended as wages, it being considered that their education during this time is a full equivalent for their services. When the full term of two years is completed the nurses receive, if they pass all the examinations and are otherwise satisfactory, a diploma certifying to the regular course of training and practice, and are then permitted to wear the graduates' badge of the school.

The majority of graduates engage in private nursing, but some are invited to remain in the service of the Hospital as head nurses, and receive twenty (20) dollars, twenty-five (25) dollars, thirty (30) dollars, thirty-five (35) dollars per month, with opportunities of promotion. Graduate head nurses who prefer to remain in hospital work, or return after a term of private nursing, are given post-graduate instructions in ward management, hospital housekeeping, and minor administration.

The school year has no fixed date, but accepted candidates may enter whenever vacancies occur. They are, as a rule, received in the order of acceptance, but those desiring to enter with less delay can generally anticipate a fixed date by placing themselves on the emergency list. When coming to the Hospital they should bring with them the following articles: Three gingham or calico dresses, made plainly; eight large white aprons, made of bleached cotton, with bibs plain at the top and gathered slightly at the bottom, two buttons on the band, with hem at bottom five inches in depth and two inches shorter than dress skirt; two bags for soiled clothes; one pair of scissors, a pin-ball and a napkin-ring; a good supply of plain underclothing—every article to be distinctly marked with pen and indelible ink with the owner's name. Twenty-one pieces are allowed for the laundry each week.

Nurses must bring suitable outer garments for stormy weather, and they are required to wear noiseless, broad-toed and flat-heeled boots. If the teeth are out of order in any way they must receive attention before coming for the probationary month. Nurses are required to wear the Training School uniform after they join the school. Material for dresses and caps will be sold at cost price.

Hours of duty for day nurses are from 7 A.M. to 8 P.M.; for night nurses from 8 P.M. to 7 A.M. No nurse is required to do both day and night duty on the same day, except in rare emergencies. Each nurse on day duty is allowed one hour after 1.30 o'clock P.M., for rest and recreation, one-half day after 1.30 o'clock P.M. each week, and four hours on Sunday. Two weeks' vacation is allowed each year. If nurses are sick they are cared for in the Hospital, but they receive no pay. Nurses on night duty are required to be in bed until 4 P.M. Nurses may be called upon for five months' regular night duty during the two years' training; besides "special cases" to a limited number.

COURSE OF INSTRUCTION.

JUNIOR YEAR.

Manual of Hospital Nurses (1)	Domville.
Manual of Nursing: Medical and Surgical (2)	Humphrey.
Lectures on Fever Nursing (3)	Wilson.
Physiology, Anatomy and Hygiene	Hutchison.
Glossaries, tables, technicals, etc.	Various.
A lecture once a week (for thirty-four weeks) by a member of the Medical and Surgical Staff.	

Critical Reviews on the lectures given by the Medical and Surgical Staff.

Instructions in the Wards by Head-Nurses and Senior Nurses.

SENIOR YEAR.

Handbook of Obstetrical Nursing	Fullerton.
General Anatomy, including instruction from charts, models, and the skeleton.	
Elementary Materia Medica	Various.
A lecture once a week (for thirty-four weeks) by a member of the Medical and Surgical Staff.	

Practical instruction in *Massage*. [Six lessons.]

Practical instruction in Cooking for the Sick. [Eight lessons.]

Instruction in the Wards by Assistant Superintendent of Nurses, Night Superintendent of Nurses, and Head-Nurses.

Instruction and drill in the etherizing, operating, and recovery rooms by the Operating-room Nurse.

Collateral Reading.

(1) Medical Nursing	Anderson.
(2) Lectures on Nursing	Lückes.
(3) Notes on Hospital Nursing	Florence Nightingale.
(4) Anatomy and Physiology for Nurses	Kimber.
(5) The Care of the Sick	Billroth.

DISTRIBUTION OF STUDIES.

Monday,	2 to 3 P.M.	Senior Nurses [section], <i>Massage</i> .
	3 to 4 P.M.	Junior Nurses [section], <i>Massage</i> .
	11.45 A.M.	Head-Nurses; hospital administration, ward management, minor executive work, training of Assistant-Nurses.
Tuesday,	11 A.M.	Senior Nurses [section], Operating-room.
	2 P.M.	Junior Nurses [2d class, 2d Div.], Recitation.
	3.30 P.M.	Senior Nurses [1st class, 2d Div.], Recitation.
Thursday,	3.30 P.M.	Third year Nurses, Recitation.
	2 P.M.	Senior Nurses [section], <i>Massage</i> .
	3 P.M.	Junior Nurses [section], <i>Massage</i> .
Friday,	11 A.M.	Senior Nurses [section], in Operating-room.
	2 P.M.	Senior Nurses [1st class, 1st Div.], Recitation.
	3 P.M.	Senior Nurses [1st class, 3d Div.], Recitation.
	4 P.M.	Lecture to School in Operating Amphitheatre by a member of the Medical and Surgical Staff.
Saturday,	2 to 5 P.M.	Senior Nurses, Cooking Class.

LIST OF LECTURES AND SUBJECTS.

A lecture is given to the Training School on Fridays at 4 P.M., in the Operating Amphitheatre, by a member of the Medical and Surgical Staff, once a week between September 15 and June 15. The following are among the lectures given:

Five.—Surgical Dressings: poultices, washes, fomentations, bandaging, splints, leeches and blisters, enemas, surgical hæmorrhage, etc.

Three.—Theory of Wounds: modes of healing, granulations, ulcers, cellulitis, suppuration, sloughs, erysipelas, pyæmia, gangrene, sepsis, etc.

Three.—Bacteriology, brief history and general theory: micro-organisms; general distribution in air, water, etc. Elementary consideration of pathogenic and non-pathogenic micro-organisms. Exhibition of apparatus and cultures. Practical points for nurses.

Two.—Theory of Sepsis: aseptic treatment, different methods; dressings, with demonstrations and "quiz drill."

Two.—Emergencies: hæmorrhage, burns, heat-stroke, fits or seizures, drowning, fractures, immediate treatment of wounds and injuries, foreign bodies in eye, nose and ear, poisons, domestic emergencies, and practice of expedients.

Two.—Surgical anatomy and landmarks, hæmorrhages, etc.

One.—Surgical Operations: care of patients before, during, and after operations; anæsthesia and recovery; accidents, hæmorrhage, shock, especially as in private nursing.

One.—Abdominal Surgery: including ovariectomy, herniotomy, operations for abdominal injuries, etc.

One.—Fractures: varieties, preparation and care of splints and apparatus for treatment, management of cases, etc.

Three.—Medicines: avenues of taking; preparation and doses; classes of internal and external poisons; cautions; hospital formulæ.

One.—Nursing in Fevers: theory of fever, symptoms and course of, different plans of treatment, nurses' duties as to symptoms, bed, clothing, secretions, baths, food and management of cases.

Four.—Infectious fevers, especially diphtheria and scarlet fever; symptoms and course of disease; complications; infection and contagion; special nursing in croup, laryngitis, tracheotomy, intubation, etc.; management of patient, and surroundings; personal hygiene of nurse in attendance, etc.

Two.—Symptomatology in Disease; what and how to observe accurately; vital organs and special symptoms. The model sick-room; temperature, light, ventilation, care of bed, bedding and clothing, furniture, utensils, disinfection, cleansing, dusting, etc.

Three.—Care of Children in Health and Disease; diet and clothing of infants and children; various infantile diseases.

Two.—Physiology of Pregnancy and Labor; delivery, confinement, nursing.

One.—On Gynæcological Nursing; preparation of patient for examination or operation; operations after treatment, douches, use of catheter, etc. (Demonstrations to sections of senior nurses in Ward S operating-room.)

One.—Special Nursing in Nervous Diseases, including the Insane.

Two.—Special Nursing in Skin Diseases and Syphilis in the Infant and Adult.

One.—Special Nursing in Diseases of the Eye. Anatomy and Physiology of the Eye, and General Care in Health and Disease.

One.—Special Nursing in Diseases of the Ear; its care in health and disease; nurses' duties at operations and continued treatment in disease.

One.—Nursing in diseases of the throat.

One.—Infant Surgery: Preparation for, and after care.

Two.—Food Values and Principles of Cooking Food.

One.—Urine: characteristics, properties, including taking notes on same, and brief analysis. Drill in laboratory by classes in sections.

One.—Massage: its history, theory, and modes of application.

Three.—Visceral Anatomy: demonstrations by post mortems; care of the dead, etc.

LIST OF GRADUATES.

THE BOSTON CITY HOSPITAL TRAINING SCHOOL FOR NURSES.

Arranged According to Year and Sequence in Graduation.

[* Married. † Died.]

[The Badge of Graduate Nurses.]

1879.

† Miss Rosa McCormick,	Miss Elizabeth A. Andrews,	
† " N. Elizabeth Fillebrown,	* " Myra E. McIlvin,	
† " Mary L. Kelso,	* " Martha J. Blackwood.	(6)

1880.

Miss Asenith Clement,	† Mrs. Susan M. Hatch,	
Mrs. Margaret Little,	† Miss Olivia Hews,	
Miss Annie Cochran,	" Mary Monteith,	
† " Louisa Morrill,	† " Victoria O. Fowler,	
Mrs. Lucy Rice,	* " Minnie Gilman,	
* Miss Eva Hallowell,	" Anna C. Maxwell,	
" Mary E. Prescott,	Mrs. Sarah Cooke.	(14)

1881.

† Miss Mary Mack,	Mrs. Mary Griswold,	
* " Jennie Shotwell,	* † Miss Lilly Birkbeck,	
* " Flora Hadley,	* Miss Josie Smith,	
† " Mary Choate,	* " Mary A. Ferrin,	
† " Georgeanna Russell,	" Helen M. Hall,	
Mrs. Endenilla S. Neily,	† Mrs. Bertha J. Raemisich.	(12)

1882.

† Miss Carrie L. Barrell,	* Miss Annie Martell,	
Mrs. Kittie C. Soule,	" Mary Quinn,	
* Miss Georgia L. Forbes,	" Julia Macrae,	
" Laura A. C. Hughes,	" Annie E. Barker.	(8)

1883.

* Miss E. Adelaide Nason,
 " Mina P. Hill,
 * " Christina M. Gregoire,
 † Mrs. Jane E. Young,
 Miss Myra C. Hight,
 " Susie H. Hamblet,
 " Rose A. Duffy,
 " Mary C. Morris,
 " Sarah W. Emerson,
 " Clara E. Bowen,
 " Kate M. Fitzgerald,
 " Margaret McKenzie,
 " Jennie B. McIntosh,

Miss Ida M. Welsh,
 * " Annie Soper,
 " Susan Bradley,
 * " Maria Aanrud,
 * " Jane Howell,
 " Emma L. Stowe,
 " Elizabeth Stewart,
 " Clara C. Tubman,
 " Mary E. Gordon,
 " Lucinda McBride,
 " Eliza F. Spencer,
 * " Mary L. Drown.

(25)

1884.

Miss Lucy L. Drown,
 * " Annie J. Ellers,
 † " Fanny A. Tucker,
 * " Elizabeth Rinker,
 " M. Elizabeth Barr,
 * " Elizabeth Banister,
 " Abbie A. Reed,
 " Margaret McKean,
 " Armina C. Manchester,
 " Harriet M. Seaver,

Miss Bessie S. Morrill,
 * " Ellen A. Dunton,
 " Margaret Macdonald,
 " Anna M. Battelle,
 * " Lillian I. Price,
 * " Sarah G. Whitney,
 " Mary E. Scannell,
 Mrs. Mary B. Runyan,
 Miss Catherine Murray.

(19)

1885.

Miss Fannie A. Prindle,
 " Adelie B. Braman,
 * " Minnie Starr,
 " Clara D. Hoar,
 " H. Josephine Shepherd,
 " Sarah M. Cushing,
 " Clara M. Rowell,
 * † " Glendine Malkson,
 " Lida S. Young,
 " Annie S. Miller,

Miss Jessie J. Glen,
 * " Mary E. Woods,
 * " Emily Neale,
 " Mary J. Rimmer,
 * " Kate G. Early,
 * " Helen L. Godding,
 " Julia E. Reed,
 " Colina E. M. Somerville,
 * " Jessie Read.

(19)

1886.

* Miss Alice E. Cole,
 * " Emma J. Gordon,
 † " Sarah E. Snow,
 * " Mary E. Stimson,
 " Georgianna Shaw,
 " Flora E. Welch,
 " M. Annabel Moore,
 " Emma E. Cole,
 " Lucretia F. Williams,
 " Mary C. Stewart,
 " Emma B. Morrison,
 * " Mary A. Martin,
 * " Rosina G. Brine,
 " Ruth A. Bassett,
 " Mary A. White,

Miss Emma R. Trafton,
 " Susie B. Swanton,
 Mrs. Mary E. Bradbury,
 Miss Cicely M. Whitaker,
 † " Elizabeth Fearon,
 " Ella A. Starkweather,
 " Lizzie A. Wilber,
 " Mary J. Dunway,
 Mrs. Josephine S. Wood,
 " Isabella R. Outerbridge,
 Miss Mary Fyfe,
 " Anna M. Hawes,
 * " Olivia Byrne,
 " Agnes C. Haley.

(20)

1887.

Miss Luise Gibbpeck,	Miss Emily A. Rogers,
" Mary Gruganc,	" Ruthett Adams,
" Maria Wagner,	* " Louise J. Knaut,
" Libbie S. Ainsworth,	" Caroline H. Keer,
" Charlotte A. McCallum,	" Oceania Nickerson,
" Frances H. Petrikin,	* " Abbie J. Jenkins,
" Mary A. Hahn,	" Flora Macrae,
* " Delia O'Brien,	" Alzine M. Castlebury,
" Lucia E. Weymouth,	" Sarah C. Hamlyn,
" Julia A. Purdy,	" Elizabeth J. Fay,

" Alice E. Bailey,	" Jennie Dudley,
" Helen A. Quinn,	" Frances L. Mackie,
" Mary E. Kenney,	* " Olive A. Hawes,
† " Sarah M. Webber,	* " Evangeline McDonald. (30)

1888.

Miss Emma J. Jones,	Miss Alice M. Hodgson,
* " Flora E. Hodges,	" Belle A. Stevens,
" Stella Lyman,	" Myra A. Swain,
" Bertha Elliot,	" Mary E. Collingwood,
" Alicia Ring,	" Almeda J. Goodspeed,
" Maria B. Clark,	" Ella M. Gordon,
" Maria L. Eustis,	" Lucia F. Vickery,
" Emily O. Boswall,	" Evelena Chapman,
" Eleanor Cobb,	* " Helen Coull,
" Eva M. Homer,	" Lilia M. Alexander,
Mrs. Alice H. Porter,	" Mary O. Barnes. (22)

1889.

Miss Mary M. Riddle,	Miss Catherine M. Haggart,
* " Ella E. Owen,	" Abbie F. Proctor,
" Alice G. Symonds,	" Emma E. Penfold,
* " Emmanette Veazie,	* " A. Etta Bodwell,
" Mary A. Morris,	" Rose Morgan,
" Maggie J. Thompson,	" Annie E. McCarthy,
" Annie Monroe,	* " Mabel H. Tibbetts,
* " Mary E. R. Wilkinson,	" Mary E. Jones,
" Jennie R. Dix,	" Louisa L. Smith,
* " Rosalin A. Meggison,	" Eliza Jones,
* " Mary O. Ellms,	" Mary Scarlett,
" M. Affia Martin,	* " Sarah L. Richardson,
" Abbie A. Bliss,	" Jessie M. Symonds,
* " Anna R. French,	" Rachel Gordon. (28)

1890.

Miss Mary T. Carroll,	* Miss Henrietta Rankin,
*† " Jennie M. Harlow,	* " Margaret J. Moore,
" Harriet H. Page,	" Margaret A. Motschmann,
" Elizabeth Rice,	" Grace G. Pillsbury,
" Charlotte F. Grant,	† " Eliza F. Wadsworth,
" Carrie B. Whallon,	" Elizabeth Olmsted,
" Catherine A. McNally,	" Annie C. Chamberlain,
Mrs. Ida M. Rice,	" Fannie P. Cooke,
Miss Anna Harms,	" Alice G. Dexter,
" Catharine B. Graham,	" Florence E. Levensaler,
* " Amalie H. Lakemann,	* " Bessie Sands,
* " Mabel Van Cortlandt,	" Kate M. Walsh,
" Sarah M. Cox,	" Minnie McLeod,
" Grace H. Raine,	" Clarissa A. M. G. Baldwin,
Mrs. Annie L. Ray,	" Cynthia A. Spencer. (30)

1891-2 (13 mos.)

Miss Lucetta J. Gross,
 " Ellen Magner,
 " Susan E. Stamer;
 * " C. Isabelle Wright,
 * " Addie E. Waterman,
 " Ethel Sharpley,
 " Sarah L. Taylor,
 " Jessie C. Pearce,
 " Ida A. Nutter,
 * " Mary Brennan,
 " Janet Anderson,
 * " Elizabeth A. Lary,
 * " Anna R. Collins,
 " Sarah E. Hilt,
 " Delia Knight,
 " Mary E. Comey,
 † " M. Georgena McNear,

Miss Elizabeth E. Spratt,
 " Etta A. Chamberlin,
 * " Minnie S. Nickerson,
 " Henrietta B. Chisholm,
 " Annie L. Mullen,
 " Anna S. Langin,
 " Lydia A. Brewster,
 " Laura B. Bingham,
 * " Lucy S. Byles,
 " Jessie MacDonald,
 " Maria A. Nicholl,
 " Nora McCormick,
 " Mary A. Foster,
 * " Elizabeth J. McGeachy,
 " Minnie J. Stowe,
 " Emma T. Elliott,
 " Alice T. Myrick. (34)

1892-3.

Miss Martha S. Barr,
 " Elizabeth C. Fairbank,
 * " Margaret E. Nelligan,
 † " Sadie R. Harbourne,
 " Annie S. Clapp,
 † " Julie M. Rogivue,
 " Annie B. Dick,
 " Grace M. Hart,
 " Mary Jones,
 " Anna B. Jordan,
 * " Nettie M. Burnett,
 " Hulda J. Oliver,
 " Inez Maud Wright,

Miss Myra Fletcher,
 " Susie J. Hill,
 * " Janet Rutherford,

EXTRAS. — In addition to the above, the following extras may be ordered by the Visiting Physicians and Surgeons: Milk, Beef Tea, Chicken Broth, Mutton Broth, Gruel, Oatmeal Mush, Corn Starch, Boiled Rice, Eggs, Beefsteak, Mutton Chop, and Chicken.

A small allowance of Milk and Beef Tea will be provided for each ward daily. The House Physician or Surgeon may order these articles by a signed special order in each case when needed for patients who enter in the intervals between the regular visits of the Visiting Physician or Surgeon to whom the case is assigned.

All Wines and Liquors, Ale, Beer, etc., will be ordered by the Visiting Physicians and Surgeons only, excepting in emergencies, when special orders for the same may be given by the House Physician or Surgeon, to be afterwards approved by the Visiting Physician or Surgeon, as the case may be, or by the Resident Physician.

By Order of the Trustees.

JULY 2, 1878.
